

## Soil Emergence Trap – Headless / Insect Rearing Tent (BD5110)

MegaView Science Co., Ltd.

<http://BugDorm.com> • <http://MegaView.com.tw>

### Package Contents

- 1 Soil Emergence Trap
- 4 Plastic Feet
- 4 Plastic Splints
- 6 Support Poles

### Assembly

1. Push one plastic foot onto one end of each support poles.
2. Push one pole, foot-end first, into each of four sleeves of trap.  
Foot prevents poles from puncturing sleeves.
3. Push a splint over top of each support pole used in Step 2.
4. Thread remaining two poles through tabs on top of trap to form an X.
5. Push ends of these two poles into top half of each splint used in Step 3.  
**Make sure fiberglass ends are completely inserted into splints.**
6. Lash ribbons around crossed poles.

### Caution

- ※ Operating Temperature: -10 to 60°C
- ※ Fiberglass poles may break when top two poles are not completely inserted into four splints.
